HENRI COANDA
CHALLENGE

03-04 JUNE 2025

THE HENRI COANDA CHALLENGE

The inaugural event of the year, formally known as "The Emile Berliner Challenge", the regatta aimed to find a solution to the problems of maintaining military helicopters deployed on operations. The sailing result was a victory for Cobham but, in addition, two representatives from the OEM, The Boeing Co. and six operatives from the support organization, Vector Aerospac were deployed to an operational theatre.

In 2025, The Henri Coanda Challenge continues to take over where The Emile Berliner Challenge left off in 2018 by bringing an aviation-centric community, not just helicopter OEMs, together in support of Sail2Help.

Although the names of the regattas may at first glance seem strange, there is some science behind their choice. Emile Berliner was an inventor best known for inventing the gramophone and the flat disc phonograph records that the player used. However, he and his son Henri designed a helicopter which flew successfully in 1919. Henri Coandă was a Romanian inventor, an aerodynamics pioneer and builder of an experimental aircraft, described by Coandă in the mid-1950s as the world's first jet, a controversial claim disputed by some and supported by others.
